

Modification d'un item et actualisation de l'affichage

Activation du mode édition :

```
self.model.read(id, function (data) {
```

```
self.view.render('editItem', {id: id, title: data[0].title});
```

Si édition validée (successful) :

```
if (title.length !== 0) {  
  self.model.update(id, {title: title}, function()  
  {
```

```
    self.view.render('editItemDone', {id: id, title: title});
```

```
else {  
  self.removeItem(id);
```

Si édition annulée (canceled) :

```
self.model.read(id, function (data) {
```

```
self.view.render('editItemDone', {id: id, title: data[0].title});
```
